

COAL TAR BALM

50 ml

An active natural balm with antiseptic and anti-inflammatory properties for the relief of skin, redness, itchiness and cuts / abrasions without the harmful chemicals.

Applications:

- Psoriasis
- Eczema
- Seborrheic Dermatitis

- Suitable as an antiseptic for open wounds.

What is Coal Tar?

A black, viscid liquid formed during the distillation of coal. It has antiseptic and anti-inflammatory properties.

How does Coal Tar work?

It is used on the skin to treat the itching, scaling, and flaking due to skin conditions such as psoriasis or seborrheic dermatitis. It works by causing the skin to shed dead cells from its top layer and slow down the growth of skin cells.

Is Coal Tar safe?

Coal Tar is monographed **by the FDA as Category 1 (safe and effective)** Over The Counter ingredient for use in the treatment of dandruff, seborrhoea, psoriasis and various other skin conditions.
