

PRE-WASH ANTI-BACTERIAL SPRAY

250 ml

Normal washing of clothing, linen and washable footwear does not eliminate bacteria in the fabric.

This can lead to contamination of the skin or re-contamination of a skin related condition.

Proguard Natura Pre-Wash Anti-Bacterial Spray is used to target areas of active wear that are most prone to bacteria, fungi and mould due to excessive perspiration in the target area (ie under arms, under breasts, groin and feet).

It is the bacteria, fungi and mould that cause issues like Athletes Foot, Jock itch, Contact Dermatitis and Nail Infections.

The Pre-Wash Anti-Bacterial Spray is a very effective, natural product that has been independently tested by an independent MCC (Medicines Control Council) accredited testing laboratory to eliminate various fungi, mould and bacteria on contact.

The garment high risk area is to be sprayed and left for 5 minutes prior to washing.

Applications : Socks, underwear, active wear or washable footwear.
